

John,

After years of searching for a lightweight, breathable yet protective under layer I have found it!. The Shortsleeved Jacket Pro you sold me from Xion has saved me at least 4 times in the last 12 months.

As you know I play polo for Vancouver, in polo the ball is hard and the speed is north of 100 MPH. Polo is likened to be the second fastest game next to hockey and all we wear are helmets, knee and elbow pads.... Crazy I know.

I play back on the team and as such am often in the path of the knock in hits, the first time this jacket saved me was a direct hit from the line to my thoracic spine, without this jacket I would have no doubt been hospitalized. Rather the ball deflected off me with a sound that stood the other players still. I looked around, assessed my body and went to the ball. If this jacket only ever stopped this one event it is paid for in spades already.

I have ordered the rest of our team one each. I will be recommending this jacket to the USPA. It is so easy to play polo in and you can wear it under your jersey.

Thank you John and Xion.
Grant L.

I am wearing the black #2 here.
